

HAYWARD®

MaxFlo™

»»» Medium Head Pump Series

Reliable performance and durability in a medium head pump.

MaxFlo™ is the economical pool pump that offers trusted performance for entry-level applications. It is a reliable option for all types and sizes of pools with smaller, original plumbing.

ENERGY EFFICIENT AND RELIABLE

MaxFlo's two-speed model (SP2810X152) is ENERGY STAR certified, so along with superior energy efficiency, local utility rebates may also apply. These pumps are also compliant with industry regulations including Title 20 and APSP 15.

EASY INSTALLATION AND SERVICE

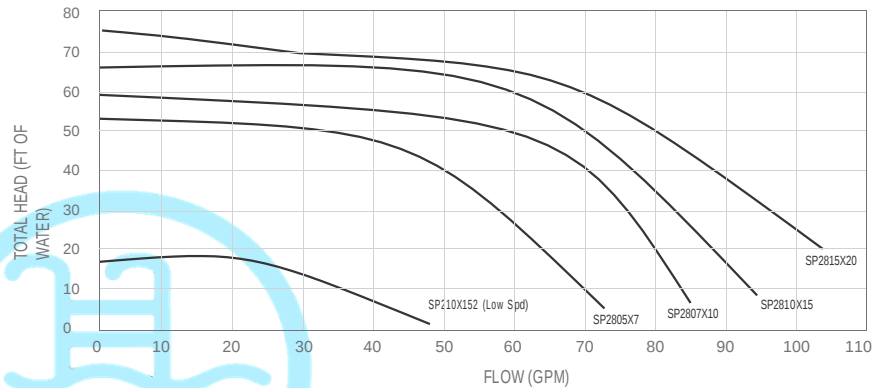

MaxFlo provides simple access to all internal parts. Motor and entire drive group assembly can be removed without disturbing pipe or mounting connections by disengaging just four bolts.

QUICK CLEANING DESIGN

Exclusive swing-away hand knobs make strainer cover removal easy: no tools required, no loose parts and no clamps. A see-through strainer cover design lets you see when the basket needs cleaning and a no-rib strainer basket provides easy debris removal.
